

QUALITY MANAGEMENT SYSTEM POLICY STATEMENT POL-01, rev. F

Our mission is to provide quality products and services with a high level of operational reliability, to meet the full requirements and expectation of our customers and other relevant parts, observing all the legal and regulatory requirements applicable to **design, manufacturing and service activities for oilfield equipment and valves**, in full accordance with Company's manufacturing product profile.

Our vision is to achieve the excellence in our activity and to develop those essential values that manage the processes of integrated management system:

- Commitment - The Company is committed to meet specific customer requirements and to ensure continuous Customer satisfaction by giving them the necessary support to achieve their goal,
- Environmental awareness - The Company acts in the best interests of our customers, our employees and contractors, and the communities in which we live, being concerned to provide a safe and sustainable environment,
- High performance - Company's policy is to achieve sustained, profitable growth by providing products, services and consultation with a high satisfaction level of the needs and expectations of its customers.

We are committed to produce and provide quality products and services that meet the requirements and expectations of our customers, increase the reputation of the company "REPEDE Pressure Control", with minimal impact on the environment and on the health and safety of all parties involved in the manufacturing and use of our products, all these at optimal costs.

The QMS adopted is a reflection of the managerial culture which consists in the application of management principles by all employees through their involvement in identifying the elements for the continuous improvement of processes, and in the identification and approach of risks in the quality field.

We continuously focus on implementing, maintaining and improving the effectiveness of the quality management system integrated with the environmental and occupational health and safety systems, adopted in accordance with the reference standards ISO 9001, API Spec.Q1 and ISO 14001, ISO 45001.

QMS policy is the basis to achieve and develop of the following priority objectives of the organization:

- ✓ Continuous improvement of QMS at the level of applicable reference standards and specifications,
- ✓ Ensuring the manufacture of quality products based on the fully identification and conformance with Customers' needs and at the level required by the applicable standards, API specifications, European PED Directive 2014/68 / EC, etc.;
- ✓ Open and efficient communication with customers and suppliers, in order to achieve high satisfaction levels for all stakeholders involved;
- ✓ Ensuring of the suitable human and material resources, continuously improving the products and services we provided, in order to achieve and maintain a level of quality which enhances company's reputation among customers;
- ✓ Risk assessment and emergency planning to reduce or eliminate the impact on delivery and products quality;
- ✓ Identification both of the risks and the opportunities of QMS, of the compliance obligations, the context in which the company operates, as well as the understanding of the needs and expectations of stakeholders, to ensure that QMS can achieve its goals;
- ✓ Developing a favorable working environment for achieving product compliance with the requirements of applicable standards and specifications, while respecting environmental and occupational health and safety requirements
- ✓ Ensuring of the awareness and training of the entire personnel concerning the requirements specified in the applicable QMS documentation.

The General Director of “REPEDE Pressure Control” assumes the total responsibility regarding the conformity of the products that fall under the incidence of the European PED Directive 2014/68/EC.

The decisions taken for the continuous improvement of the integrated management system are communicated to all the employees in the organization to consistently satisfy the needs and expectations of its customers.

"REPEDE Pressure Control" company policy is applied in all functional and execution areas, and the QMS is mandatory for all levels of management and execution.

The management of “REPEDE Pressure Control” evaluates the policy and reviews it, if necessary, within the periodical analyses of the management, in order to ensure the efficiency of the undertaken activities.

As General Director, I fully commit to the continuous development and improvement of the Quality Management System areas within our company.

General Director

IACOB CERLAT
